

I am outraged by the power that the Sinclair Broadcast Group, a huge media corporation has to manipulate the public. By mandating that all of its stations air the anti-Kerry documentary, they undermine both democracy and laws designed to prevent power from being concentrated in the hands of a wealthy and powerful few. Please protect American citizens from this kind of manipulation and abuse of power. Enforce laws that state that media corporations exist to serve the public interest and not their own interests or the interests of one particular political party.

Sincerely,  
Susan E. Morgan
